

Alimak Hek Group is the world's leading supplier of mast climbing equipment and added value services for both temporary and permanent installations providing the most cost efficient, reliable, and flexible vertical access solutions for people and materials in the construction and general industry. The Alimak Hek Group is jointly owned by two private equity companies, 3i plc (UK) and Ratos AB (Sweden).

HEK MEGADECK

For maximum platform length

HEK MAST CLIMBING WORK PLATFORMS

a versatile working environment above ground level.

The alternative to traditional scaffolding and suspended systems. Single or twin mast versions with platform lengths of 2.7 m to 38.4 m. Working heights of up to 200 m, lifting capacity up to 5,500 kg.

HEK TRANSPORT PLATFORMS

for transporting bulky and heavy loads.

Developed for vertical transportation of goods and people up to a height of 120 m. Payloads of 500 kg (incl. 3 persons) and 1,500 kg (incl. 7 persons). Travel speed for personnel 12 m/min and materials only 24 m/min.

HEK MATERIAL HOISTS

efficient transportation of goods for smaller projects.

These durable and robust material hoists are easy to transport and assemble. With payloads up to 1,000 kg and a maximum working height of 80 m.

TOTAL SUPPORT SERVICES

to ensure full customer satisfaction.

Service doesn't end at the sale. With every purchase, we offer you the full extent of our experience and customer service: pre- and aftersales, training, support on site and application engineering.

HEK MEGADECK

For maximum platform length

HEK MEGADECK

The HEK MEGADECK is a single unit platform component, with a total length of 6 metres (20 ft). With this unit, the platform length of the existing modular Hek machines can be extended and strengthened. As a consequence, the HEK MSM Super, the HEK MSHF and the HEK MS ProMax can achieve a maximum platform length of 32.2 (105'6"), 32.6 (106'9") and 38.4 metres (126'), respectively, using the HEK MEGADECK.

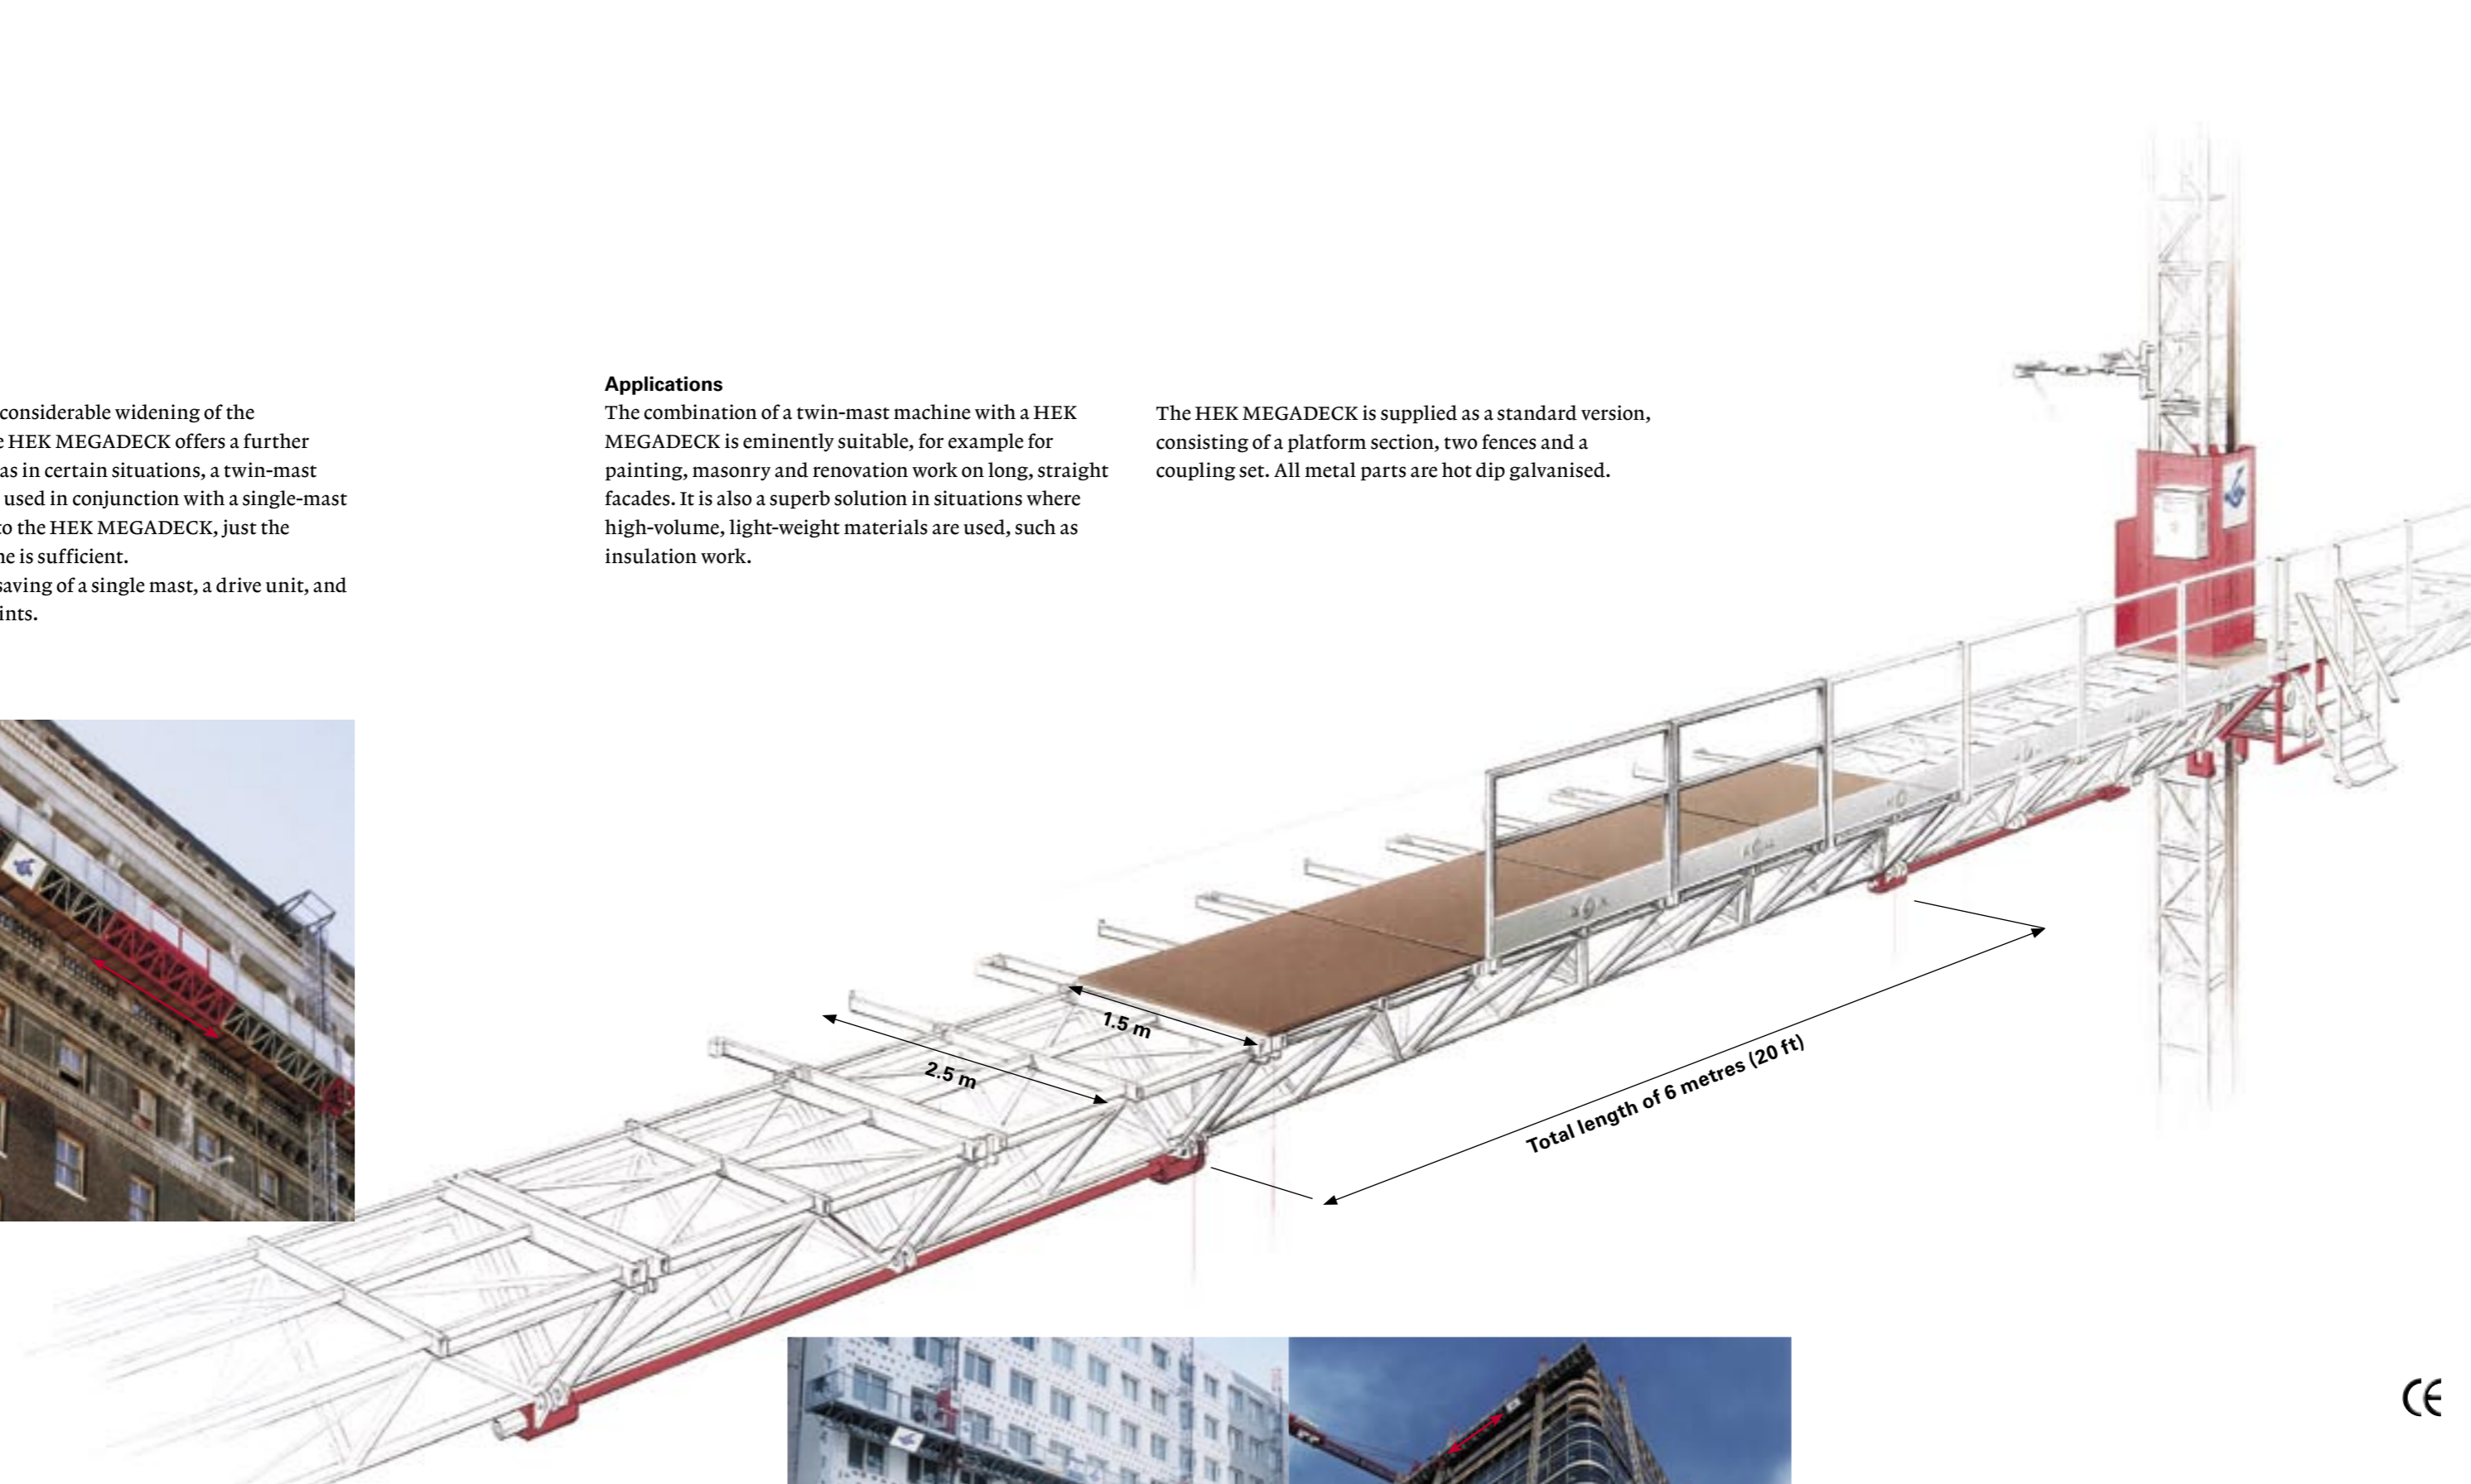

Advantages

In addition to the considerable widening of the workplatform, the HEK MEGADECK offers a further advantage. Whereas in certain situations, a twin-mast machine has to be used in conjunction with a single-mast machine, thanks to the HEK MEGADECK, just the twin-mast machine is sufficient. This represents a saving of a single mast, a drive unit, and various anchor points.

Applications

The combination of a twin-mast machine with a HEK MEGADECK is eminently suitable, for example for painting, masonry and renovation work on long, straight facades. It is also a superb solution in situations where high-volume, light-weight materials are used, such as insulation work.

The HEK MEGADECK is supplied as a standard version, consisting of a platform section, two fences and a coupling set. All metal parts are hot dip galvanised.
